

Sanxin PCD Die Price Guidelines

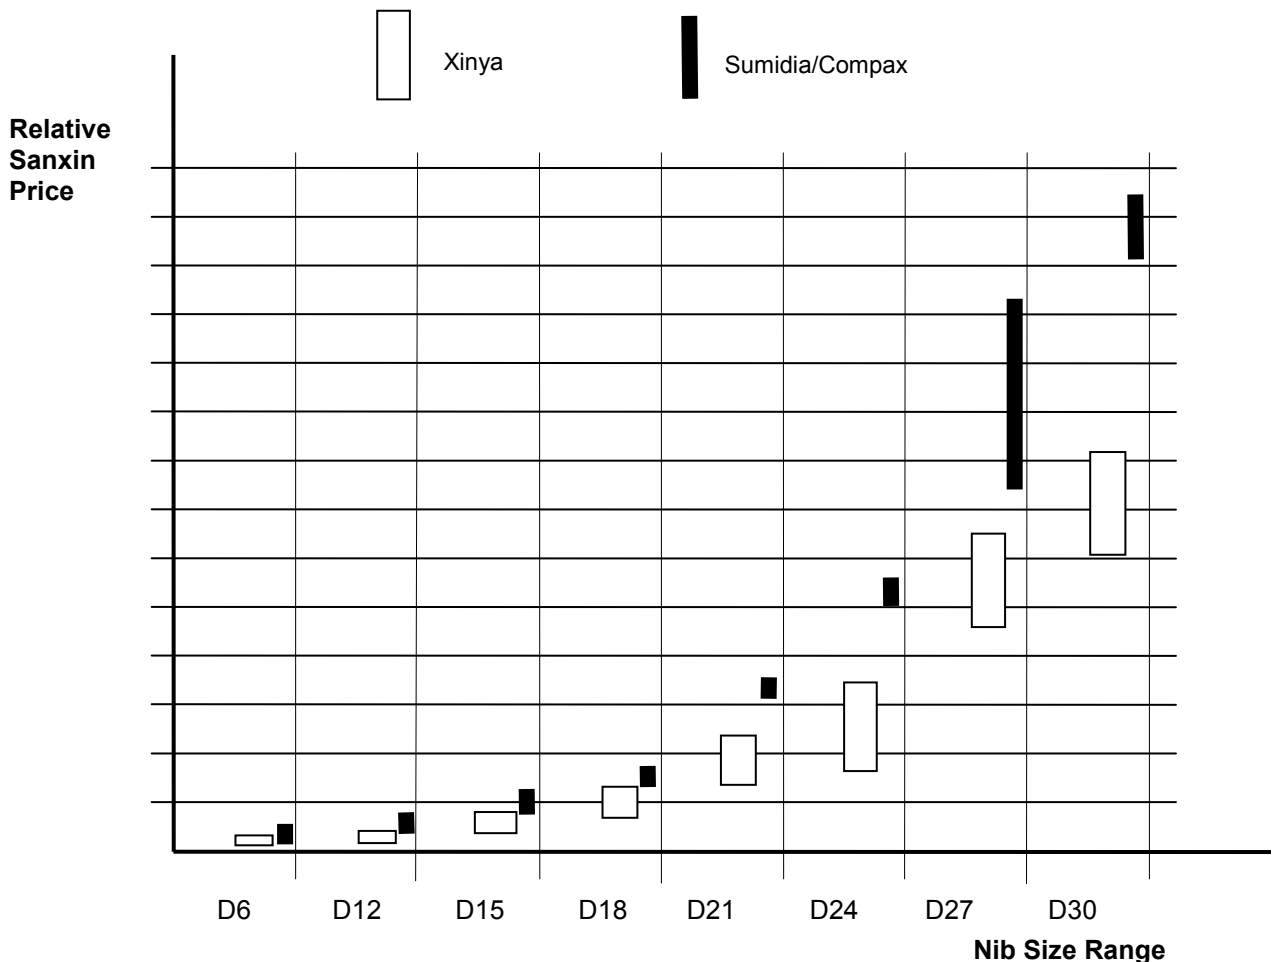

Prices of Sanxin PCD Wire Drawing Dies are highly competitive in the global marketplace. This makes Sanxin PCD Dies look very cheap indeed when viewed in the context of an advanced Western economy such as that of the United States of America.

Say we take Sanxin's PCD Dies manufactured using Sumidia® and Compax® PCD as a reference point. Then, the price of Sanxin PCD Dies using Xinya® PCD is just over half the price of the reference dies.

But Sanxin's PCD dies manufactured using Sumidia® and Compax® PCD are already priced well below the prices at which top quality Sumidia® and Compax® PCD dies are usually supplied in Western markets.

In other words, any way you look at it, you can save your company a lot of money by specifying Sanxin PCD Dies. And if you would like to confirm that Sanxin quality is every bit as good as the best PCD dies from Europe and the United States, Sanxin has provided a very good way for you to do that. You are warmly invited to try some Sanxin Dies *Obligation-Free* in your plant.

RELATIVE PCD DIE PRICES

Sanxin Natural Diamond and Monodie Die Price Guidelines

Due to significant fluctuations in the prices of Natural Diamond Stones, it is necessary to confirm prices prior to ordering. In general, expect excellent Price/Performance, even if the relative advantage is not quite so much as with Sanxin PCD Dies.

Sumidia® and Compax® are registered trademarks of Sumitomo Corporation and Diamond Innovations Inc. respectively. The products are not owned by Sanxin, but are purchased by Sanxin as required, for incorporation in Sanxin's products.
